

This traditional zero phosphate can be used to balance growth and toughen the sward. Added iron gives rapid green up results. A balanced NK formulation gives strong growth with added turf strength.

1 Application should be 40 – 120Lt per Ha in 700Lt water.

2 Nutrient inputs per 20Lt/Ha:
3.75 kg/ha Nitrogen
0 kg/ha Phosphorus
3 kg/ha Potassium

3 As with most liquid feeds, repeat applications will be required every 2-4 weeks.

4 Nitrogen scours:
Ureic nitrogen
Nitric nitrogen

5 Clean spray tank after application with an approver cleaner such as Prestige Super Tank Cleaner.
