

# EARLY START

## DIRECTIONS FOR USE

Early Start will control dew formation on turf areas such as tees and greens. Can be applied all year round depending on the degree of dew formation. Needs no watering in after application, although it is advisable to irrigate the applied areas before mowing. If that is not possible then leave mowing baskets off until rainfall occurs.

Early Start will typically give 1-3 weeks control depending on rates used, mowing frequency and climatic conditions. Apply with a boom sprayer or hand sprayer at the rates recommended in the table below.

**DO NOT TANK MIX EARLY START.** Early Start must be thoroughly mixed prior to application.

## APPLICATION RATES

	100 m <sup>2</sup>	500 m <sup>2</sup>	Hectare
Early Start	12 - 20 ml	60 -100 ml	1.2- 2 litres
Water	4 - 6.6 litres	20 -33 litres	400- 660 litres
